MFB - Public asset management

Infrastructure development

- Construction of motorways
- Modernisation of railways
- Upgrading and maintenance of road network
- Development of energy transportation and distribution network

Agriculture and forestry

- In case of similar activities (e.g. 22 forestry companies)
- Using synergic effects deriving from:
 - harmonised activities
 - joint control of management

Financial services; EU and government fund intermediation

- Providing wide range of financial services being important from the point of view of the realisation of the macro economic objectives
- Simplifying the access to development funds for final beneficiaries
- Using the advantages of government guaranteed fund raising by MFB for the Group

Other assets

- Activities made with the involvement of strategic subsidiaries:
 - investment incentive
 - development of tourism
 - development of trade
 - regional development

The main management tasks of forestry companies are

- ✓ preservation,
- ✓ representation and
- ✓ use of the natural values of the forests, and
- ✓ the management of the protected natural areas;

affecting the

- ✓ silviculture,
- ✓ lodging,
- ✓ wood production & trading, and
- ✓ Hunting

industries.
