

Case studies

A work in teams of 4 students each, to create a short power point presentation expressed your own ideas about possible bioeconomy practice in **your own country .**

With concern on these two questions :

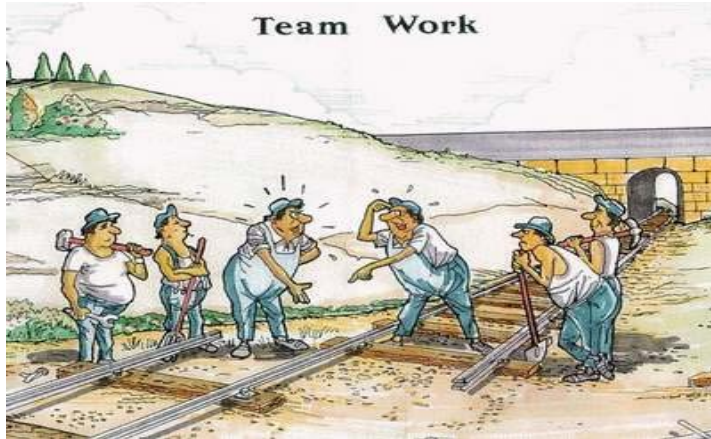

1) What **type of bioeconomy practice would you recommend as **the most effective for your country?****

How does your bioeconomy innovation bring a **positive change to the social foundation in society?**

How does your innovation bring a **positive net environmental impact ?**

2) Do you see any risk or obstacles in terms of bioeconomy practice in your country or in general ?

Friday last day of course

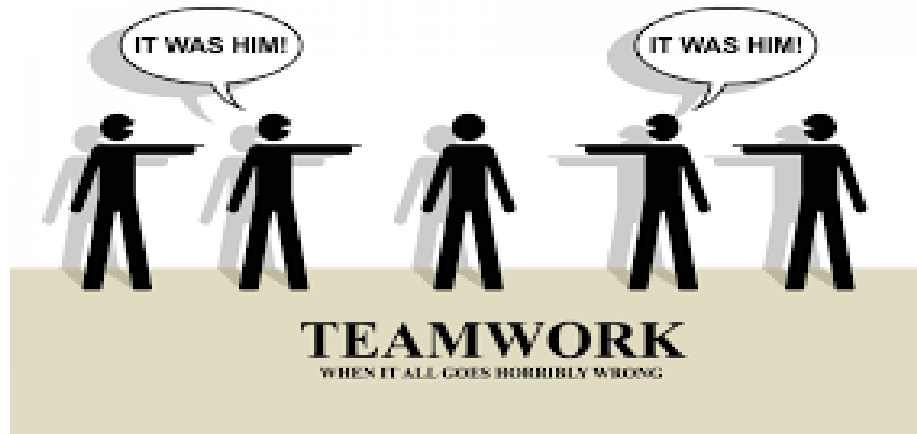

1) student teams will have the opportunity to present their cases - up to 20 minutes for a team.

During the preparation of case studies, students will have access to the internet for the data collection and also have a continuous assistance form the course lecturers.

2) Each participants will make a quiz: <http://www.fvaweb.eu/biochallenge/>

STUDENTS QUESTION

How would you like to live in the future and how would bioeconomy contribute?

The case presentation will be also one of the main condition for obtaining a certification of the bioeconomy course participation.
