

Dear POWER4BIO partners,

As promised, I can now share with you the final and more detailed agenda of our Cross-visit in Central Germany, taking place on 23rd and 24th of June in the morning hours.

Please remember to register to the event. This would not only give us an idea of the total number of attendees but also help us organize better the workshop session during the second day. The link for the registration is <https://www.dbfz.de/en/projects/power4bio/registration/>

Furthermore, **please save the morning of 25th of June** for the online equivalent of the “technical visits”. Presentations will take 1 hr each. The presenters will give a description of their sites, processes and products in about 30 min and we will have the remaining 30 min for all your questions.

- **June 25 – 10:00 am:** Presentation of the Fraunhofer Center for Chemical-Biotechnological Processes CBP Leuna by Gerd Unkelbach, Head of Leuna Site. (More information: <https://www.cbp.fraunhofer.de/en.html>)
- **June 25 - 11: 00 am:** Presentation of the company Corvay Bioproducts GmbH, by Chief Technology Officer, Dr. Joachim Schulze.
Corvay bioproducts gmbh, was founded in Halle at the end of 2018 as one of the latest developments of Corvay GmbH. A consulting topic turned into a project and then into a company: Corvay Bioproducts develops processes for the production of specialities for the chemical industry from renewable resources and intends to bring these into production together with other investors.

These “technical visits” are open to POWER4BIO and all of your regional stakeholders, who might have interest to attend as well.

In case you might have additional questions do not hesitate to contact me,

Best regards,

Laura García
